

Miles

Tow Trucks

Miles Tow Trucks or MTT is a family owned tow truck manufacturing company located in İstanbul, Turkey. The company has more than 30 years of experience in manufacturing high quality hydraulic equipment. Its innovative and hardworking team has made MTT the bravest and best motivated tow truck brand in the world.

Since 2001, MTT is the largest tow truck manufacturer by quantity in Turkey. MTT achieved a global success as well in international markets by offering innovative designs, fastest operation features, safer mechanisms, longer product life metrics and lower maintenance metrics. As of today, MTT is not solely a manufacturer, but also provides consultancy services for public authorities to plan, procure and operate their recovery and tow trucks, as it has been doing for Istanbul Municipality for 17 years.

MTT manufactures and supplies a wide range of tow trucks for both public authorities and private sector owners. MTT manufactures Eurolift Side Loader Truck (MTT 4011), Sliding Platform Recovery Truck (MTT 4021) and Crane Equipped Lift Away Truck (MTT 4031) as standard production and most selling products, but have many other custom made tow truck options as well, such as fullbed recovery truck, heavy duty wrecker truck and rotating sliding platform truck. Thanks to the country-configuration applied before delivery, MTT assures its partners that the tow trucks will be fully compatible with the country of use in terms of the weather conditions, road conditions and traffic inspection requirements.

MTT's vision is to continue its success achieved in Europe on a global scale and be a leading tow trucks manufacturer in the world with strict adherence to work ethics, quality assurance and customer satisfaction.

Municipality & City

Traffic Departments,
Police Departments & Public Institutions

Chassis Providers

MTT Eurolift Truck - MTT 4011

Miles Eurolift Truck is MTT's most selling product, well-known as the most secure and the fastest way of towing a vehicle. Miles Eurolift Truck can respond to today's megacity problems by evacuating the vehicles within less than 60 seconds without making the city traffic waits and without damaging the vehicles.

The exceptionally well-designed Miles Eurolift Truck has become the first choice of global business partners, municipality, traffic departments, police departments and public institutions. Miles Eurolift Trucks are equipped with the most advanced mechanical, hydraulic and electronic mechanisms, assuring that system handling tasks are now more in an efficient manner, providing longer product life cycles and lower maintenance metric than ever. It allows the operator to handle the operation solely by controlling and monitoring from the inside of the cabinet via usage of interchangeable quad screen HD monitor, under-chassis camera system and joystick panel without operator getting out of the truck cabinet.

MODEL

MTT Eurolift Truck - MTT 4011

Technical Specifications

Chassis	: Standard commercial chassis (Iveco, Mercedes-Benz, MAN, Volvo, etc)
GVW	: 12.000 kg (upgrade to 15.000 kg optional)
Lifting Mechanism	: MTT double tower lifting system with four hydraulic chassis stabilizers.
Lifting Capacity	: 2500 kg (other payload upon request)
Control	: Joystick control pannel in the cabinet, valve block control
Typical Options	: Rotating beacon Night lighting Audio warning device
Additional Options	: Rear towing equipment Available upon request

MTT 4011 ensures to provide all clients the best possible return on their investment thanks to its; fast operational features, safe towing mechanisms, longer product life cycles, and lower maintenance metrics.

MTT Sliding Platform Recovery Truck - MTT 4021

MTT Sliding Platform Recovery Truck is an advantageous choice of global partners with its powerful performance, improved design and longevity. MTT offers its customers a wide range of capacity options between 2.500 kg and 50.000 kg for a wide range of use.

Its improved design allows you to pull malfunctioned and crashed vehicles with its powerful performance, advanced load platform, and offers improved viewing angle and excellent maneuverability. MTT Sliding Platform Recovery Trucks are not affected by harsh weather conditions and ambient conditions with specially developed galvanized steel coating technology.

The operator must manually connect the rope from the drum to the conveyance by using the hooks on the side of front tires of the vehicle and load it quickly and reliably thanks to hydraulically operated adjacent frame by pulling it onto the carriage, the safety straps and vehicle tire support brackets are essential way of keeping the vehicle still while it is transported.

MTT Rear Towing Equipment - MTT 4041

MTT Rear Towing Equipment - MTT 4041 is built to lift up vehicles and tow heavy machineries where it is attached at the end of the Miles Tow Trucks. Our rear towing equipment can make the heavy-duty towing jobs go smooth with its durability, efficiency and convenience. MTT Rear Towing Equipment varies from other towing hooks with its advanced mechanism. This time-saving and cost-efficient equipment is designed to handle a towing operation of two vehicles at the same time for our tow trucks.

Our Global Vision

We are proud of being the first choice of public institutions in the solution of vehicle towing systems. Especially in Europe and Gulf Countries, MTT branded tow trucks are the symbol of quality and innovation.

Thanks to the country-configuration applied before delivery, MTT assures its partners that the tow trucks will be fully compatible with the country of use in terms of the weather conditions, road conditions and traffic inspection requirements. In addition to the 2-year full product warranty, a 5-year product performance warranty is also provided to the customer when the country configuration package is added.
